Nico Sherban

TEACHER | B.SC. IN GEOPHYSICS

About Me

During the past several years, I developed many caring, leadership, and professional skills while often experiencing life outside of my comfort zone. I have lived in six and traveled through more than 25 countries. Along this journey, I became an experienced international teacher with high-level technical and analytical skills enriched through the Geophysics degree I obtained at the University of Calgary in Canada. I enjoy the heterogeneity and richness our world offers to us. I am nourished by this interest and have gained a profound cultural awareness let me to better understand and communicate with people from many nations. I highly value diverse experiences, opinions, and world views that others have to offer, and try to apply what I have seen and learnt from others to improve myself and contribute to the world around me.
